

COVID-19 TESTING FOR FERTILITY PATIENTS & STAFF

MDR Fertility Pharmacy and ReUnite Rx have partnered to offer exclusive COVID-19 diagnostic testing for fertility clinics to help screen patients prior to starting fertility treatment. The test, developed by Fulgent Genetics, is a reverse transcription polymerase chain reaction (RT-PCR) test to detect SARS-CoV-2, the virus that causes COVID-19.

Fulgent Genetics, a leading clinical genetics laboratory, was founded in 2011 and is publicly traded on the Nasdaq (FLGT). Fulgent's lab is CLIA-certified, CAP-accredited, and NYS-approved with quality controls built into every step. All specimens are processed in the United States.

WHEN ARE SAMPLES PROCESSED?

Samples are tested and processed 7 days a week.

WHAT IS THE TURNAROUND TIME?

Reports are delivered electronically within 24-48 hours of receipt of the sample by the lab.

HOW MUCH DOES THE TEST COST?

The cost for each test is \$125 (includes shipping).

WHAT SAMPLE TYPES ARE ACCEPTED?

Nasal Swab or Nasopharyngeal Swab
